Training Tomorrow's Psychologists

Psychotherapy Interventions for Children and Adolescents determined by DSM-V Diagnosis (3 CE's)

Instructional Level

Advanced

Course Description and Target Audience

This presentation will discuss the most common psychological disorders for children and effective treatment interventions. It describes diagnostic criteria for childhood disorders and provide evidenced based interventions for each disorder. These disorders include: Attachment disorders, ADHD, Anxiety Disorders, Oppositional Defiant Disorder, Depressive disorders and Autism Spectrum Disorders.

The target audience is mental health providers (advanced doctoral level psychology trainees, psychologists in practice, master's level clinicians etc).

Learning Objectives

- To educate regarding the diagnosis of common childhood disorders
- To educate regarding some of the challenges faced in providing interventions to children and adolescents
- To educate regarding the most common psychological disorders for children and explore the most important treatment interventions, given the age and diagnosis of the child.
- The course will provide information to use play and art as part of the therapeutic process in working with children and adolescents.

Presenter Information

Lisa Wooley, Psy.D., received her bachelors in psychology from the University of Michigan, and her Masters and Doctorate in Clinical Psychology from Baylor University in 1998. Dr. Wooley has 20 years of experience in providing assessment and therapy to children, adolescents, and their families. She has specialized in therapy with children and adolescents in the area of trauma, ADHD, Anxiety and Trauma. She currently teaches Child and Adolescent Psychotherapy at Grace College.

Play Therapy: Understanding the Play Themes of Children (3 CE's)

Instructional Level

Advanced

Course Description and Target Audience

The presentation discusses the assumptions and indications for Thematic Play Therapy. The stages of play therapy are described from the exploratory to termination. The presentation provides information regarding necessary toys for play therapy and it delineates what type of toys facilitate different types of play. The course explores a wide variety of play themes and discusses what these play themes may mean regarding the child's internal working model. The course discusses a wide variety of interventions utilized in play therapy including: feeling, relational and empowering responses. There is also a discussion of providing corrective emotional responses as well as insightful/causal interpretations. There are no known risks associated with this presentation.

The target audience is mental health providers (advanced doctoral level psychology trainees, psychologists in practice, master's level clinicians etc).

Learning Objectives

- To educate individuals regarding the stages of play therapy.
- The course will provide information regarding common themes in play therapy and the possible means that themes may mean for the child.
- The course will provide interventions utilized in thematic play therapy from feeling, relational, empowering and interpretational responses.

Presenter Information

Lisa Wooley, Psy.D., received her bachelors in psychology from the University of Michigan, and her Masters and Doctorate in Clinical Psychology from Baylor University in 1998. Dr. Wooley has 20 years of experience in practicing play therapy with abused and traumatized children. She was initially trained in play therapy by a certified play therapy supervisor who lectures on the topic nationally, and her dissertation topic was exploring the themes of children with parents with a personality disorder.
