

To use the app, you'll need to download HCMtoGo from Google Play Store or Apple App Store:

When you first log in, it will ask you for your Company Shortname and your Region. Your Company Shortname is **105751** and your region should be North America.

After that, it will prompt for username and password. This is the username and password you set up yesterday. Once you've signed in the first time, if your phone has the capability for thumb or face recognition for logging in that will also be available in this app.

From there, it should be basically a mobile version of what you're used to in the desktop version.
